Advanced Systems Concepts, EXAConsult Agree To Partnership

Companies Planning Joint Projects Using ASCI's ActiveBatch® Enterprise Job Scheduling Software as a Solution for Ensuring Timely and Actionable Business Intelligence (BI) Data

MORRISTOWN, NJ and HÜCKELHOVEN, GERMANY – (September 3rd, 2008) – Advanced Systems Concepts, Inc. (ASCI™), a leading provider of system software solutions that enhance Windows, UNIX, Linux and OpenVMS systems, and EXAConsult GmbH, one of Germany's top data warehouse and Business Intelligence (BI) consulting firms, today announced a new marketing partnership.

Since its introduction in 1997, ActiveBatch has set the standard for power and convenience for enterprises requiring a comprehensive, business-integrated scheduling solution for a wide range of data processing tasks. The easy-to-use application proactively supports the growing transformation of job scheduling software from simply a back-office application to a strategic corporate solution, providing employees with reliable and relevant data on a daily basis.

“As businesses become increasingly dependent on Business Intelligence platforms for critical decision-making, the need for timely and accurate data becomes paramount. This is where ActiveBatch really provides value,” said Jim Manias, vice president of marketing and sales for Advanced Systems Concepts. “More and more of our corporate clients around the world are understanding how ActiveBatch can deliver data that reflects the present business state. With its strong reputation in the data warehousing and BI fields, EXAConsult will be an ideal partner for expanding deployment of ActiveBatch in Germany and throughout Europe.”

In addition to planning, implementing and supporting client owned-and-operated data warehouse projects, EXAConsult operates its own data center to maintain the diverse applications and systems of customers. “After seven years of daily use in our data center, we can attest to the high capacity of ActiveBatch,” said Justus Jung, managing director of EXAConsult. “ActiveBatch can execute and monitor numerous processing tasks. In addition, its ability to employ event-based triggers and to insert near real-time updates into databases, ensures the most up-to-the-minute data analysis.”

As a skilled industry IT consulting company, EXAConsult has an understanding of ActiveBatch implementation in a wide range of market areas. It is also dedicated to all aspects of data warehouse

development, extending well beyond specific components. EXAConsult's expertise in large DGH projects include consulting services and other proprietary tools to ensure a successful project.

EXAConsult currently generates a number of assignments from its "Operating Services" division, involving operating control of DGH projects. These services apply to customer data center operation, for which ActiveBatch can be used as a component. This customized service uses EXAConsult's own monitoring tools, components and loading ticketing system with appropriate reporting procedures so the customer can benefit from 24-hour security.
