**Advanced Systems Concepts, Inc. Announces
ActiveBatch® Job Scheduler Earns Windows 7 Logo**

*Popular Workflow Automation Application Meets Microsoft Standards
For Compatibility, Reliability and Performance*

MORRISTOWN, NJ – (September 9, 2009) – Advanced Systems Concepts, Inc. (ASCI), maker of ActiveBatch® job scheduling software and other solutions that enhance Windows, announced today that ActiveBatch Version 7, the application’s latest version, has successfully earned the Windows 7 logo. The step assures ActiveBatch customers that their application will successfully integrate with Windows 7, scheduled for general availability release on October 22, 2009.

Deployed at enterprises in 36 countries, ActiveBatch is a versatile, scalable and one-stop solution for unattended job execution across a variety of software platforms. The application uniquely adds strategic business value by automating operations in real-time for improved IT operations throughout an organization.

ActiveBatch is compatible with all recent Windows operating systems including Windows 2000, Windows XP and Windows Vista, as well as Windows Server 2003 and 2008. By achieving certification for Windows 7, ActiveBatch has the ability to leverage many of the new features designed to simplify and improve everyday computing tasks.

“With today’s announcement, ActiveBatch users around the world can rest assured they can easily integrate and/or migrate their systems to Windows 7 without concern for the reliability of their workflows and job plans,” said Jim Manias, Vice President of Marketing and Sales for Advanced Systems Concepts. “Advanced Systems Concepts is proud to deliver the full capabilities of Windows 7 to ActiveBatch customers.”

ActiveBatch, currently available in Version 7, enables users to automate and centrally manage jobs and workflows across multiple and disparate computing platforms, applications and databases. ActiveBatch Version 7 adds to these capabilities by offering a dynamic Service Oriented Architecture (SOA) and related Web Services tools to support internal and external Web Services.

Among V7’s other new features are an updated jobs library offering production ready jobs involving SQL reporting and a wide range of database functions. The SQL Server library supports functions such as SSIS, backup, DTS, SQL Server jobs and reports.
