## Advanced Systems Concepts' ActiveBatch® 7 Job Scheduler Achieves SAP® Certified Integration With SAP NetWeaver®

*Certification Validates ActiveBatch's Ability to Automate Tasks Involving SAP Solutions and Other Applications and Systems Via One Centralized Interface*

MORRISTOWN, NJ – (November 17<sup>th</sup>, 2009) – Advanced Systems Concepts, Inc. (ASCI), maker of ActiveBatch® workload automation and job scheduling software and other solutions that enhance Windows™, Linux, UNIX, z/OS and OpenVMS systems among others, today announced that ActiveBatch 7 has been certified by SAP AG for integration with the SAP NetWeaver® technology platform. The SAP® Integration and Certification Center (SAP ICC) has certified that ActiveBatch 7 integrates with the SAP NetWeaver Application Server (SAP NetWeaver AS) component via the background processing and job scheduling 6.10 integration scenario (BC-XBP 6.10). The certification denotes that ActiveBatch 7 automates and manages workflows involving both SAP solutions and non-SAP applications, databases and platforms.

By achieving certified integration with SAP NetWeaver, ActiveBatch 7 gives users a cross-platform job scheduling framework that centralizes the management of all jobs and plans using a single, centralized interface similar to their current dashboard.

Deployed at enterprises in 36 countries, ActiveBatch lets users automate and centrally manage disparate jobs and workflows, including tasks involving the most common operating systems, enterprise business applications and even Web Services. Supporting Windows, UNIX, Linux and OpenVMS platforms and applications, as well as Web Services and SOA, ActiveBatch offers both an event-based architecture and a jobs library of “production-ready” job steps that helps users quickly and efficiently create and reuse templates and services. Such job steps expedite the IT workload automation process without having to create and maintain custom scripts.

“Advanced Systems Concepts is committed to the continual and aggressive development of ActiveBatch as the best-of-breed job scheduling and workflow management solution. This SAP certification is an important step in that ongoing process,” said Jim Manias, Vice President of Marketing and Sales for Advanced Systems Concepts. “Now, SAP users not only have assurance they can manage their SAP and non-SAP jobs using ActiveBatch, but they also can incorporate ActiveBatch’s extensive list of features with the processes of their SAP solutions.”

With ActiveBatch, users can trigger workflows based on events, other processes, date and time

schedules and more. The solution, which offers extensive functionality for alerts, monitoring, constraints and more, is well-suited for Customer Relationship Management (CRM) and Supply Chain Management (SCM) systems as well as financial and other legacy application environments.

ActiveBatch's powerful, proven and integrated Jobs Library gives users a complete menu of templated, production-ready business processes including SQL Server, Crystal Reports, Oracle, file transfers (FTP, SFTP and FTPS), Web Services and many more. Processes can be easily integrated within SAP activities using a drag-and-drop approach to workflow design.

### SAP PartnerEdge™

In addition to ASCI's ActiveBatch 7 receiving certified integration with SAP NetWeaver, Advanced Systems Concepts is now part of the SAP PartnerEdge program as an SAP software solution partner. Through the program, partners work closely with SAP to develop and certify the technical integration of their solutions with SAP software. Integrated partner applications extend, complement and add value to SAP solutions, thereby helping mutual customers more successfully meet business needs and drive strong results.

ActiveBatch 7 integrated with SAP solutions is separately licensed as an extension of the ActiveBatch system. For more information about ActiveBatch, including white papers and a free copy of a recent Advanced Systems Concepts, Inc.-commissioned study on the economic impact of ActiveBatch, log on to [www.advsyscon.com](http://www.advsyscon.com).

### ***About Advanced Systems Concepts, Inc.:***

*Headquartered in Morristown, New Jersey, Advanced Systems Concepts, Inc. offers many software products and options for users of Windows, UNIX, Linux, HP OpenVMS and NSK systems as well as IBM z/OS, AIX, i5OS and SCO UNIX. These products provide answers to software developers and system managers with improved system efficiency and utilization. Advanced Systems Concepts today has over 200,000 licenses installed and a worldwide base of customers in 36 countries around the world.
