1. GRANT OF LICENSE.

This license grants you the following rights.

- **Software** Except as set forth below, you may use the Software on a computer system the number of which is specified on an attached accepted ASCI Price Offer/Quotation and/or ASCI invoice(s) which reference this Agreement. The term "computer system" refers to a physical system running a single operating system instance or a guest operating system instance in a virtualized and/or cloud environment. The Software is licensed by Product Edition and all Product Editions and additional Software are subject to the terms of this license. Your right to use the Software is perpetual, however it is limited to the version you purchased and no rights are granted, as part of this license, to any new versions of Software unless you simultaneously and continuously subscribe to a maintenance plan as indicated in the "Warranty Expiration" section. The word "version", is defined by this Agreement, through the major version number of the Software (i.e. ActiveBatch V10 represents Version 10 and ActiveBatch V11 represents a new version).
- **Documentation.** You may copy the electronic documentation without additional charge as long as such copies are kept within your company.
- **Storage/Network Use.** You may store or install a copy of the Software on a storage device, such as a network server, used only to install or run the Software on your computers over an internal network; however, you must acquire and dedicate a license for each separate computer on which the Software is installed or run from the storage device. A license for the Software may not be shared or used concurrently on different computers. You agree to inform all users of the Software of the terms and conditions for its use.
- **System Failure/Disaster Recovery.** In the event a licensed machine fails and is unusable, you may temporarily install the software on another similar machine subject to the same Product Edition limitations that may be in force. No portion of the software may be active until such time as the licensed machine has actually failed. In addition, you may install a copy at your Company's Disaster Recovery site (either owned or rented through a third party) whose purpose is to allow temporary usage of the Software in the event of a catastrophic site failure.
- **Backup.** You may make two (2) copies of the Software for backup archival purposes only.
- **Volume Purchase.** If you have acquired this Agreement as part of a Volume Purchase, then you may make the number of additional copies of the Software as authorized on the printed copy of that purchase, and you may use each copy in the manner described above.

- **Dual Media.** If this Software was delivered on more than one form of electronic media, the right to use the Software is still limited to a single computer.

2. OTHER RIGHTS AND LIMITATIONS.

- **Licensing Management.** This Software has the ability to regulate its use based on this Agreement and employs a License Management Facility. The Software Serial Number is the computer encoded form of this License. You understand and acknowledge that the ability to use or copy the Software and/or to breach the Agreement may be prevented through the use of this License Management Facility. Each Serial Number provides licensing and use for various Product Editions as well as the number and type of Execution Agents that be used simultaneously. Further you agree to keep the Software Serial Number confidential and not to disclose the serial number to anyone outside your Company. You understand and acknowledge that the various ActiveBatch Product Editions provide varying access to the underlying ActiveBatch and other ASCI technologies. You acknowledge that your ability to use the Software may be impeded if you attempt to breach, inadvertent or otherwise, this Agreement. Any product limitations are noted within the accompanying Documentation.
- **Reverse Engineering.** You may not modify, translate, reverse engineer, de-compile, disassemble the Software, or make any attempt to discover the source code to the Software.
