

# BLUEPRINT OF A WORKLOAD AUTOMATION SOLUTION

WHAT EVERY BUSINESS NEEDS TO IMPROVE IT AGILITY

According to Gartner, most large organizations have more than 3 automation tools in their environment.

Having multiple automation tools creates complexity. Organizations need to consolidate their automation environment with one centralized solution.

Here are the processes IT leaders are automating or plan to automate:

The blueprint for success is an IT automation solution with the key capabilities to keep business and IT running smoothly.

Policy-Driven Governance

Dynamic Workload Balancing

Predictive Analytics & Reporting

Centralized Monitoring & Alerting

Self-Service for Business Users

Breadth of Integrations

Multi-Tenant Architecture

Service Level Agreements

Advanced Date/Time Scheduling

Pre-Built Job Steps

Event Driven Automation

Built-in Change Management
